1. USIG is connected with the various SAG factories and installations by its own independent telephone system, referred to in German as the "Industrie-Leitung". Extensions in the series from zero to 80 are located in the USIG headquarters in Berlin; SAG factories outside of USIG headquarters are reached by the following dialing code:

200 series - Magdeburg
300 series - Halle
400 series - Leipzig
500 series - Chemnitz
600 series - Dresden

There is, furthermore, a direct line through the Industrie-Leitung to an office in Frankfurt/Oder, which is identified by the operator in the latter city by the phrase: "USKA".

2. USIG, which moved to Berlin-Karlshorst during the week of 27 to 31 July, 1953, will reportedly remain in its new quarters at the corner of Waldow-Allee and Rolandseck only until 1 September 1953. It is reported that USIG will then move into the hospital located at present inside the Karlshorst compound. 1/ Alexander Dott, with his USIG bookkeeping section, is now located in the attic of the Rolandseck building; the bookkeeping section for the USIG garage is located in the cellar of the building. Bobyler (fnu) has taken over rooms 245 to 247 in the new building. A number of German employees of USIG who have been living in houses in Berlin-Weissensee, Trarbachstrasse, are reportedly being required to move to Karlshorst. 2/

3. N. V. Guskov, chief of the USIG Registry, has been reassigned after a three-years tour in Germany. His successor has already taken over. Valye Kureshkina, chief of the interpreter pool, has also been reassigned, but the name of her successor is not known.

25X1A 1/ [redacted] Comment. Presumably the Sankt-Antonius Hospital is meant.

2/ [redacted] Comment. These dwellings in the Trarbacherstrasse were occupied by Soviet officials of USIG until 1951-52, when they were turned over to German employees of USIG. It is possible that they are now needed by personnel of the unidentified Soviet unit which has moved into Ashania Haus in place of USIG.
